The time period for reply, if any, is set in the attached communication.

<b>Office Action Summary</b>	<b>Application No.</b> 10/663,154	<b>Applicant(s)</b> YOUNG ET AL.	
	<b>Examiner</b> Leslie Wong	<b>Art Unit</b> 1794	

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 30 July 2007.
- 2a) ☒ This action is **FINAL**.                      2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 25-48 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP 58013358 in view of Takashata (US 4212803) and Hammond (US5153019).

JP 58013358 discloses an acid milk wherein a calcium salt (e.g. calcium lactate), a saccharide, and a stabilizer (e.g. pectin, alginic acid propylene glycol) are used as is claimed. JP 58013358 also discloses the addition of an acid material such as citric acid to provide an acidic milk beverage (see abstract). It is further noted that the addition of calcium lactate followed by an acid would obviously result in the claimed pH values as the same components are used.

The claims differ as to the use of homogenization and the specific use of casein and whey as the milk protein.

Takashata (US 4212893) disclose the preparation of a milk beverage comprising the use of a stabilizer, the addition of an organic acid to obtain an acid pH, and the conventional use of homogenization, wherein the final pH is from 3.4 to 3.6 (see entire patent, especially the claims).

Hammond discloses the general use of soy milk as a milk substitute (see entire document, especially claims 1 and 4).

It would have been obvious to a person of ordinary skill in the art, at the time the invention was made to use homogenization as taught by Takashata in that of JP 58013358 because the use of homogenization is conventional in the milk beverage art. It would also have been obvious to a person of ordinary skill in the art, at the time the invention was made to interchange soy milk and conventional milk (i.e. casein and whey) as taught by Hammond in that of JP 58013358 because the use soy milk as a substitute is conventional in the milk beverage art.

Each of the instant claims is a product-by-process claim. It is well settled that the determination of patentability of a product-by-process claim is based on the product itself, not by the method of making it.

Applicant's arguments with respect to claims 25-48 have been considered but are moot in view of the new ground(s) of rejection.

It is noted that Applicant states on page 5 of the response submitted July 30, 2007 that "soy milk is used as a milk-substitute."

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1794

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Leslie Wong whose telephone number is 571-272-1411. The examiner can normally be reached on Tuesday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Keith Hendricks can be reached on 571-272-1401. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
